

ADLER Aqua-Cleaner

80080

Cleaning solution for dried-on water-based paint residues for **industrial and professional use**

PRODUCT DESCRIPTION

General

Cleansing solution with good dissolving power for dried water-based paint residues. For cleaning spraying machines and for industrial cleaning of application equipment and conveyor belts.

Application areas

- Cleaning of application equipment, spraying machines and conveyor belts when working with water-based paints.

PROCESSING

Instructions for use

- ADLER Aqua-Cleaner must be mixed with water in a 1:1 ratio before use. In case of severe dirt we recommend mixing ADLER Aqua-Cleaner in a ratio of 7:3 with water.
- The mixture ADLER Aqua-Cleaner / water can be applied directly onto the surface to be cleaned using a brush or sponge. Smaller stainless tools can be placed in the mix for a short time.
- If the ADLER Aqua-Cleaner / Water mixture is pumped into the lacquer circuit of an application system (spraying machine, casting machine, etc.), the filters must be cleaned after removal and the circuit rinsed with clear water. After cleaning sprayers such as cup guns or airless devices, rinse them with water.

ORDERING INFORMATION

Size of trading unit

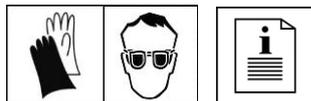

10 l, 25 l

FURTHER DETAILS

Durability/storage

At least 2 years in the original sealed containers.
