

**Bluefin JET** 2950

Water-based, quick-drying clear coating for industrial use

	PRODUCT DESCRIPTION		
General	Water-based two-component clear coating for wood. Quick drying. Can be processed "varnish-on-varnish"; good filling power, very good cream and grease resistance (CFB); good mechanical and chemical resistance; very good light fastness; excellent anti-blocking properties. Particularly suitable for paintwork where quick stackability is required due to the production process.		
Special properties and standards	<ul> <li>ÖNORM A 1605-12 (furniture surfaces):         Resistance to chemical reactions: 1-B         Response to abrasion: 2-D (≥ 50 U)         Response to scratches: 4-E</li> </ul>		
ÉMISSIONS DANS L'AIR INTÉRIEUR  A+  A+  A B C	<ul> <li>ÖNORM A 3800-1 (fire behaviour) in conjunction with a flame- retardant substrate: flame-retardant (formerly B 1 acc. to B 3800 -1), Q1, Tr 1</li> </ul>		
	<ul> <li>French ordinance DEVL1104875A regarding the marking of construction coating products for their emission of volatile pollutants: A+</li> </ul>		
Application areas	<ul> <li>For the coating of furniture and interior finishing exposed to normal levels of stress, such as shelves in the home, fronts and permanently visible areas, surfaces used on seating furniture and not permanently visible areas (exept tabletops): Application areas III – IV in accordance with ÖNORM A 1610-12.</li> </ul>		
	For industrial coffin varnishing.		
	<ul> <li>For painting wall and ceiling elements.</li> </ul>		
	<ul> <li>For hardly inflammable or flame-retardant coating systems.</li> </ul>		
	PROCESSING		

# Instructions for use

- Please stir the product before use.
- The temperature of the product and object, and the room temperature must be at least +15 °C.
- Various types of wood such as Oak and Larch, etc. contain watersoluble substances, which become active when overcoating with water-based furniture coatings. To prevent discolouration or marks (these can be more or less pronounced depending on the origin of the wood), when painting oak, larch and other types of wood rich in active substances we therefore recommend priming them first with ADLER PUR-Primer 25291.

12-18 ZKL 2950

ADLER-Werk Lackfabrik, A-6130 Schwaz

Fon: 0043/5242/6922-301, Fax: 0043/5242/6922-309, Mail: technical-support@adler-lacke.com

Alternatively, ADLER Aqua-Intense GL 30016 can be used as a primer for hardwoods.

- Please follow our "Working guidelines for water-based furniture varnishes".
- Please observe the relative technical data sheets of the products.

# **Blending ratio**

100 parts by weight Bluefin JET 2950 4 parts by weight of ADLER Aqua-Vernetzer 82210

ADLER Aqua-Vernetzer must be carefully worked into the paint components by stirring before processing. We recommend observing a waiting time of approx. 10 min. before processing.

#### Pot life

### 3 days

Increased temperatures reduce the pot life.

# **Application technique**

Application method	Airless	Airless air- supported (Airmix, Aircoat, etc.)	Cup gun
Spray nozzle (ø mm)	0.23 - 0.33	0.23 - 0.33	1.8 - 2.0
Spraying pressure (bar)	100 - 120	60 - 90	3 - 4
Atomized air (bar)	-	1 - 2	-
Thinner		water	
Thinner amount amount added in %	-	-	approx. 5
Application quantity per application (g/m²)	approx. 120 - 250; total quantity applied (primer and top coat) up to max. 500		

The shape and properties of the substrate affect the consumption/yield. Accurate values for consumption must be obtained by applying trial coats in advance.

# **Drying times**

(at 23 °C and 50 % rel. humidity)

Sandable and recoatable	after approx. 2 hours
Manipulable and stackable	after approx. 2-3 hours

The figures given above are reference values. The drying time depends on the type of substrate, coat thickness, temperature, air exchange and relative atmospheric humidity.

Lower temperatures and/or high level of atmospheric humidity can increase the drying time.

In order to improve the firmness of the subsequent coat, we recommend drying overnight at room temperature. In addition, this keeps the content of solvent residues in the paint film low.

# Cleaning the working equipment

With water immediately after use.

To remove dried paint residues we recommend using ADLER Aqua-Cleaner 80080 (diluted 1:1 with water).

	OUDOTDATE	
	SUBSTRATE	
Type of substrate	Hardwood and softwood (solid wood); Special application MDF: MDF boards of good quality and with a high moulded density (e.g. on 19-mm boards greater than 700 kg/m³)	
Substrate property	The substrate must be dry, clean, capable of holding the paint, free from separating substances such as grease, wax, silicone, resin etc. and free from wood dust, as well as tested for suitability for coating.	
Preparation of the substrate	Hardwoods: Sand with grit size 150 – 180 and clean.	
	<b>Softwoods:</b> Sand with grit size 100 – 150 and clean.	
	MDF panels: Cleaning / smooth sanding with grit size 180 - 220
