

## **ADLER Brilliantalkyd**

## 52301 ff

Glossy, solvent-based synthetic resin topcoat for indoor and outdoor use on wood and metal for DIY and professional use

| General                               |   |          |            | synthetic resin topcoa         |
|---------------------------------------|---|----------|------------|--------------------------------|
|                                       | Universally usable, glossy, solvent-based synthetic resin topcoat<br>(conforms to VOC Decopaint 2010). Good resistance to weathering<br>and yellowing as well as having high gloss retention power. The<br>product is characterized by quick drying, good scratch-resistance<br>high covering power and filling power as well as optimal flow and<br>good sag resistance. Environmentally friendly due to a higher solid<br>content and white spirits free of aromatic hydrocarbons as solvent.<br>Low-odour. |          |            |                                |
| Application areas                     | <ul> <li>For the coating of wood and metal indoors and outdoors.</li> </ul>   |          |            |                                |
|                                       | • The product is not suitable for interior surfaces of furniture and cabinets due to possible odour nuisance.   |          |            |                                |
|                                       | PROCESSING  |          |            |                                |
|                                       | <ul> <li>VOC Directive.</li> <li>Please stir the product before use.</li> <li>Do not apply if temperatures are below 5 °C or higher than 30 °C and/or relative humidity &gt; 80%.</li> </ul>  |          |            |                                |
| Application technique                 | Application<br>method   | Brushing | Rolling    | Cup gun                        |
|                                       | Spraying nozzle<br>(Ø mm)   | -        | -          | 1.8 - 2                        |

ADLER-Werk Lackfabrik, A-6130 Schwaz Tel: 0043/5242/6922-301, Fax: 0043/5242/6922-309, Mail: technical-support@adler-lacke.com

Our instructions for use are based on knowledge available currently and shall guide the purchaser / user to the best of one's knowledge, but, however, must be clarified for the areas of application and processing conditions on a case-to-case basis. The buyer/user takes responsibility for the suitability and use of the delivered product. It is therefore recommended to produce a sample specimen for testing the suitability of the product. Our general terms and conditions of sale are otherwise applicable. All previous data sheets are rendered invalid with the issue of this one. Rights reserved for the modification of the container sizes, colour shades and degrees of gloss available.

| Drying times<br>(at 23 °C and 50 % rel. humidity) | Dust-dry (ISO 1517)<br>Tack-free<br>Recoatable  | after approx. 2–3 hours<br>after approx. 5–6 hours<br>after approx. 12 hours |  |  |
|---|---|--|--|--|
|   | The figures given above are reference values. The drying time depends on the type of substrate, coat thickness, temperature, air exchange and relative atmospheric humidity.                                      |  |  |  |
|   | For good thorough drying, the recommended application quantities must be adhered to. Excessive layer thicknesses lead to a considerable drying delay!   |  |  |  |
| Cleaning the working<br>equipment                 | With ADLER Adlerol aromater   | nfrei 80301.   |  |  |
|   | SUBSTRATE   |  |  |  |
| Type of substrate                                 | Wood, wooden materials, metal as well as hard PVC   |  |  |  |
| Substrate property (or condition)                 | The substrate must be dry, clean, capable of holding the paint, free from separating substances such as grease, wax, silicone, resin etc. and free from wood dust, as well as tested for suitability for coating. |  |  |  |
|   | Please observe and follow ÖNORM B 2230 Part 2.  |  |  |  |
|   | See also VOB, Part C, DIN 18363, Paragraph 3; painting and coating work.  |  |  |  |
|   | Any coatings that cannot be recoated must be removed thoroughly.  |  |  |  |
| Wood moisture                                     | Hardwoods: 12 % +/- 2 %<br>Softwoods: 15 % +/- 2 %.   |  |  |  |
| Preparation of the substrate                      | Wood and wood-based mate<br>Round off any sharp edges,<br>example, resins and pitch poo   | remove wood extractives such as, for   |  |  |
|   | Iron and steel<br>Remove rust down to bare me<br>Thoroughly remove greasy or<br>(degreaser) 80394.  | etal.<br>r oily impurities using ADLER Entfetter                             |  |  |
|   | Zinc, aluminium and other non-ferrous metals<br>Sand until matt with grinding fleece and ADLER Entfetter 80394.   |  |  |  |
|   | Synthetic materials<br>Grind with abrasive fleece.  |  |  |  |
|   | <b>Old coatings</b><br>Sand and clean intact old coa  | tings with grit size 120.  |  |  |
|   | Please observe the relative te  | chnical data sheets of the products.   |  |  |

| 1 x ADLER Alkyd-Grund 54063         To begin with, apply 1 coat of Pullex Imprägnier-Grund (imprimer) 4436000200 using a brush to raw softwoods or voutdoor that is sensitive to fungus. ## MAINTENANCE AND RENOVATION

|  | The durability depends on several factors. These include particularly<br>the type of weathering, constructional protection, mechanical stress<br>and the choice of colour applied. To obtain long durability,<br>preservation work is necessary in time. Therefore, we recommend<br>annual maintenance. |
|--|---|
|--|---|

If required, remove dust and dirt from the still intact areas and paint once with ADLER Brilliantalkyd 52301 ff.

Please observe the relative technical data sheets of the products.

Please follow our "Working guideline for coating nondimensionally stable and limited dimensionally stable construction elements." Balconies – Canopies – Timber cladding – Wooden houses / Maintenance and Renovation."
